

**STUDENTS, PARENTS, STAFF**  
**AHERA NOTIFICATION THAT THE REQUIRED SURVEYS AND RE-INSPECTIONS**  
**FOR ASBESTOS HAVE OCCURRED**

**March 10, 2016**

Once a year, every school district is required to publish a notification to the public and staff that required surveys, and re-inspections have occurred, asbestos abatement activities have taken occurred, and the location at each school, and the location of the **Asbestos Management Plans**.

The three year asbestos re-inspection was completed in 2012 by a licensed asbestos inspector.

A copy of the AHERA asbestos inspection reports and management plans are in each building in the front office in a bright red binder and are available for inspection. A copy is also at the Facilities Administration building. Copies of the asbestos project manager's final report from previous years asbestos removal work are included with the AHERA management plans.

In the last year the required six month asbestos review has been completed by a licensed asbestos inspector, in conjunction with any mechanical renovation work being done in the district. All asbestos was removed by a licensed asbestos removal contractor. Should you have any questions regarding any asbestos in the building you attend or work in please contact the Facilities Department.
